*Recruitment Expertise For Your Medical Specialty*

**Position:** Medical Director, Stroke

---

**Job Description:**

Phenomenal Director of Stroke Program Opportunity • Lead a program with a strong full continuum of care • Develop a dedicated research network • Be part of the largest rehabilitation hospital system in the state This northeastern health care system is one of the largest and most sophisticated facilities of its kind in the nation. It is a 155,000-square-foot rehab hospital with 144 beds and a CARF-accredited stroke program. You will oversee clinical care at the 28-bed inpatient stroke rehabilitation unit. The program is flexible regarding the amount of outpatient work provided. The Institute is the largest provider of inpatient interdisciplinary rehabilitation in the state offering comprehensive specialty programs in stroke as well as in brain injury, spinal cord disorders, and other neurological conditions. The responsibilities of this exciting position include: • Expansion and coordination of the stroke rehabilitation programs throughout the health system which is comprised of the rehabilitation services at 12 hospitals. This would be phase one and occur for one to three years after starting. This is a major opportunity to grow this program substantially. • Program development within a large academically-based hospital network as well as a chance to work with internationally recognized leaders in stroke and stroke rehabilitation research. The goal is to have a best practices program. • Phase one is to build the program, evidence-based practice, and perhaps most importantly for phase two, increases the patient volumes and as a result the pool of potential research subjects. • Phase two is to provide leadership a nationally recognized research program.

---
