

AMERICAN SOCIETY OF
NEUROREHABILITATION

STRATEGY MOUNTAIN

VISION

Neuro-
recovery
through
discovery

MISSION STATEMENT

To improve the lives of
people with neurological
disorders through advances
in basic and clinical research.

VALUES

High Quality Science.

We value rigorous and
evidence-based science.

Diversity and Inclusivity.

We value difference in ideas and embrace
people with all backgrounds.

Interdisciplinary.

We value the exchange of ideas among all
scientists and professionals in neurorecovery™.

Leadership.

We strive to provide leadership in the science, technology
and best clinical practices of neurorecovery™.

Education.

We value mentorship and training of the next
generation of scientists and clinicians.

CORE STRATEGIES

COLLABORATION

Intentional collaboration with related organizations to promote neurorehabilitation research

ANNUAL MEETING

Science driven meeting content featuring the most up-to-date data; networking with peers and leaders in neurorehabilitation.

EARLY CAREER RESEARCHERS & TRAINEES

Provide neurorehabilitation education and resources for early career researchers

STRATEGIC OUTCOMES

- ASNR branded partnership with:
 - Canadian Partnership for Stroke Recovery
 - Engineering organizations
 - Other neurorehabilitation orgs
- ASNR branded content at related scientific meetings
- Develop a white paper with other NR orgs on the future of NR
- Invite thought leaders from other NR orgs to annual meeting
- Explore offering an independent ASNR meeting while maintaining a relationship with SfN
- Expand scope of training, early career activities and roundtables at the annual meeting
- Develop Virtual Faculty mentoring program (longitudinal)
- Identify Virtual Faculty resources (focused queries)
